PROFIL

Software Engineering student and Full-Stack Developer with hands-on experience in designing and developing modern web applications. I have also worked on projects involving AI and Docker, gaining practical experience in integrating artificial intelligence solutions and containerization technologies. I am passionate about building scalable, efficient, and user-focused applications while continuously developing my technical skills.

EDUCATION

INSAT , Centre Urbain Nord

09/2023 – aujourd'hui | tunis

- 2nd Year Software Engineering Program
- Integrated Preparatory Program in Mathematics, Physics & Computer Science

Pioneer high school

09/2019 – 06/2023 | Sidi Bouzid

- Baccalaureate in Experimental Sciences — Honors, 17.42/20

TECHNICAL SKILLS

Programming Languages:
JavaScript, PHP, Python, C, C++, C#, Java

Frameworks & technologies :
NestJS , Node.js , React , Symfony , FastAPI , Odoo

DevOps & CI/CD :
Docker, GitHub Actions

ML / IA :
Scikit-learn, LLM ,RAG , Embeddings

Databases :
PostgreSQL, MySQL, Redis, MongoDB , Vector stores

ASSOCIATIONS & ORGANIZATIONS

Junior entreprise INSAT
Development Project Officer
08/2026 – Present

Junior Entreprise INSAT
Project Department Member
09/2025 – 06/2026

ACM INSAT
Member
09/2024 – 07/2025

LANGUES

Arabic
Maternel

English
Advanced

French
Advanced

PROJECTS

Fi Ainina
Personal Professional Project
03/2026 – 05/2026
Intelligent Monitoring and Assistance Platform for Elderly People Living at Home, combining computer vision and LLMs.

- Developed the **alert service** for managing and transmitting critical events via WhatsApp and email.
- Containerized the application and its services using Docker.

Technologies: Python, LLMs, React, Docker, PostgreSQL, Redis

CRM-PromoBiotech
Junior Entreprise Insat
03/2026 – 05/2026

- Full-stack CRM centralizing the entire sales lifecycle.
- Validation workflow with complete traceability and automated price control.

Technologies: React, NestJS, TypeScript, PostgreSQL, Docker, Git

UniSmart
Hack4Ucar Hackathon
04/2026 – 04/2026
AI-powered platform for university management.

- Developed **predictive analytics model** using Prophet to forecast key indicators.
- Implemented an **anomaly detection system** with **Explainable AI** capabilities.

Technologies: Python, FastAPI, Prophet, XAI, Anomaly Detection, Supabase/PostgreSQL, React

Insurance Bundle Predictor
DataQuest Hackathon
02/2026 – 02/2026
Developed a **multi-class LightGBM model** to predict insurance bundle selection, optimizing the Macro F1 score and deploying the model through a FastAPI. Built a Streamlit dashboard for monitoring model performance and API latency.

Technologies: Python, LightGBM, FastAPI, Streamlit, Docker, GitHub Actions

PROFESSIONAL EXPERIENCE

AI & Full-Stack Development Intern — Y'onnovia
07/2026 – 09/2026 | remote
Developed a contextual AI assistant for Odoo 19 based on RAG, semantic search, embeddings, and Qdrant, with an Odoo–FastAPI architecture and permission management. Containerized the application using Docker Compose.

Technologies: Python, FastAPI, Odoo 19, RAG, LLMs, Qdrant, PostgreSQL, OWL
